**ColorBurst Wins Two Categories of DIMA 2004 Digital Printer Shoot-Out  
The ColorBurst RIP Makes the Best Fine Art and Flatbed Prints at PMA**

Sterling, Virginia -- February 20, 2004 -- ColorBurst Systems announced today that the ColorBurst RIP produced winning prints in two categories of the 2004 DIMA Digital Printer Shoot-Out at this year's PMA show in Las Vegas, Nevada.

ColorBurst won the Inkjet Flatbed category for the second consecutive year with a print produced on the VUTEK Press Vu UV 180/600 EC. ColorBurst is the OEM RIP for VUTEK printers -- every VUTEK printer is shipped with a license of the ColorBurst RIP. ColorBurst and VUTEK have been a winning team at DIMA for three years, winning the DIMA Shoot-Out on the VUTEK 3360 (solvent inks) in 2002.

ColorBurst also won this year in the Creative Application Paper category with ColorBurst X-Proof, a Mac OS X native RIP. The winning print was made on an Epson 9600 using Epson UltraChrome inks and Epson Velvet Fine Art paper. "We are thrilled to win in the Creative Application category" said Larry Spevak, President of ColorBurst Systems. "Our Mac products are geared towards creative printing, such as photography and fine art. This award shows we've achieved the best color and quality for fine art prints."

Entries in the DIMA Digital Printer Shoot-Out were produced from target files created by Photomation Commercial Imaging & Graphics, Anaheim, California. A panel of judges conducted blind voting based on print quality and color accuracy (compared to a target print).

**About ColorBurst RIP**

ColorBurst is a PostScript® Language Level 3 compatible RIP available on both the Windows and Mac OS X platforms. ColorBurst provides superior color correction using ICC profiles. ColorBurst's color controls are the same on both platforms. ColorBurst for Windows offers more productivity tools, including nesting, preview, crop, and tile, as well as spooled queues for automated output.

The ColorBurst RIP Proofing System for Windows is SWOP® certified on the Epson 7600/9600 with UltraChrome Inks.

ColorBurst is currently the OEM RIP for VUTEK. Previous releases of ColorBurst included support for the Kodak Approval System and the XEROX Electrostatic printer, as well as an OEM version for IRIS Printers.

**About ColorBurst Systems (CSE, Inc.)**

Compatible Systems Engineering, Inc. (CSE) was founded in 1980. The company began business servicing hardware and software for the publishing and newspaper industry. In recent years, CSE has chosen to focus all of their efforts on the ColorBurst RIP and is now doing business as ColorBurst Systems.
